

Lab Cycle 1

CO1: Explore markup languages features and create interactive web pages using them.

PROGRAM 1:

Create an HTML webpage to design your CV which should showcase the use of text formatting tags, image embedding, tables, lists, and links within a page and also Link to multiple web pages.

PROGRAM CODE:

cv.html

MIT SUCCESS STORY CONTINUES!
Muthoot Institute of Technology & Management has once again given wings to the APPEARED Results 2023.

1st Rank in APPEARED Students in Kerala
2nd Rank in APPEARED Students in India

PROGRAM 3:

Create One Webpage about your hometown and its tourist attractions using Html, and External, Internal, and inline CSS. The following elements should be included in the webpage:

1. Html text formatting
2. Links to Wikipedia pages for further references
3. External, Internal, and Inline CSS
4. CSS should include font colour, positioning, background colours, text alignment etc.
5. Images of the hometown and its attractions.
6. Usage of div elements for styling.

PROGRAM CODE:**Index.html**

PROGRAM 5:

Apply positioning methods of elements on a webpage with div elements and their corresponding classes using two external stylesheets. Compare the output with absolute, and relative positioning of div elements.

PROGRAM CODE:**index.html**

```
<html>
<head>
<title>CSS Positioning Comparison</title>
<link rel="stylesheet" href="relative.css">
<link rel="stylesheet" href="absolute.css">
</head>
<body>
<h1 style="text-align: center; color: #333;">CSS Positioning
Comparison</h1>
<p style="text-align: center; font-style: italic;">(Relative vs.
Absolute)</p>
<div class="box-container">
<h2 style="color: #4682b4;">1. Relative Positioning</h2>
<p>The <b>Relative Box</b> shifts from its normal flow
position, but <b>keeps its
original space</b> in the document flow, preventing other
elements from occupying it. <br>
In here the relative box is <b>right: 40px</b> and <b>bottom:
20px</b></p>
<div class="box normal-box">Normal Box</div>
<div class="box relative-box">Relative Box</div>
</div>
<div class="absolute-container">
<h2 style="color: #556b2f;">2. Absolute Positioning</h2>
<p>The <b>Absolute Box</b> is removed from the normal
document flow and
positioned relative to its closest <b>positioned ancestor</b>
(the container). The space it
used to occupy is gone.<br> In here the relative box is <b>right:
30px</b> and <b>bottom:
30px</b></p>
<div class="box normal-box">Normal Box</div>
<div class="box absolute-box">Absolute Box</div>
</div>
```

```
</body>
</html>
```

relative.css:

```
.box-container {
border: 3px solid #0066cc;
padding: 20px;
margin: 40px;
height: 300px;
background-color: #f0f8ff;
}

.box {
width: 150px;
height: 100px;
background-color: #4682b4;
color: white;
text-align: center;
font-size: 1.2em;
margin: 10px;
}

.relative-box {
position: relative;
right: 40px;
bottom: 20px;
background-color: #ff6347;
z-index: 10;
}

.normal-box {
background-color: #ccc;
color: #333;
}
```

absolute.css

```
.box {
width: 150px;
height: 100px;
background-color: #4682b4;
color: white;
text-align: center;
line-height: 100px;
font-size: 1.2em;
margin: 10px;
```

```

}

.absolute-container {
position: relative;
border: 3px solid #556b2f;
padding: 20px;
margin: 40px;
height: 300px;
background-color: #f0ffff;
}

.absolute-box {
position: absolute;
right: 30px;
bottom: 30px;
background-color: #da70d6;
z-index: 10;
margin: 0;
}

```

OUTPUT:

CSS Positioning Comparison

(Relative vs. Absolute)

1. Relative Positioning

The **Relative Box** shifts from its normal flow position, but **keeps its original space** in the document flow, preventing other elements from occupying it.
In here the relative box is **right: 40px** and **bottom: 20px**

2. Absolute Positioning

The **Absolute Box** is removed from the normal document flow and positioned relative to its closest **positioned ancestor** (the container). The space it used to occupy is gone.
In here the relative box is **right: 30px** and **bottom: 30px**
